

ATLAS MOBILE CONCRETE BATCHING PLANT MODEL AMCB 20 (TWIN SHAFT MIXER) Capacity 20 m³/hr.

FOUR BIN FEEDER:

All the feeder bins have pneumatic operated gates.

All the four (2 x 2) bins combined have a storage capacity of 10 m³.

The gates are radial type for coarse/ fine discharge.

Sand bin is also provided with discharge.

GATHERING CUM DISCHARGE CONVEYOR:

Aggregates are discharged into gathering cum discharge conveyor which is suspended on 4 load cells. As soon as the desired recipe accumulates, gathering conveyor discharges the mix on to the mixing unit. Aggregate scale is of capacity 1000 kgs.

Gathering cum discharge conveyor is provided with idler rollers and return rollers.

WEIGHING SYSTEMS:

- Cement weighing hopper is mounted on 3 load cells with pneumatic operated butterfly valve for discharge. Cement weighing hopper capacity 200 kg is provided with pneumatic vibrator and two inlets for two screw conveyors (WAM-Italy). An optional 18 Tons inbuilt SILO is also available.
- Water tank of capacity 150 liters supported on two load cells with pneumatic operated butterfly valve and it has gate with rubber gasket at the bottom.
- Additives tank is supported on one load cell comprise of admixture flask of capacity 10 liters with feeding pump.

Cement is fed from SILO / Cement hopper to the cement weighing hopper.

TWIN SHAFT TYPE MIXTURE:

Twin Shaft type concrete mixtures manufactured by ATLAS ensure proper mixing and maximum output.

Twin Shaft type mixing unit comes in capacity of 500/350 liters and is fixed on the basic structure of the plant. Mixer having 10 (5+5) pedal arms and shell is reinforced with replaceable high wear resistance NI hard liners. The aggregates, cement, water and additives are discharged to the Twin Shaft Mixer.

Only after proper and homogenous mixing, the batch is ready to be discharged by the pneumatic system.

COMPUTERIZED PANEL WITH DIGITAL DISPLAY:

Fully computerized cabin with SCADA (optional) / PLC based control panel are a standard on ATLAS plant.

Software which is very user friendly ensures top notch performance.

Proxy switches for each control panel.

Display of the entire process of control parameters.

Provision for printing entire data like-Mix Proportion, Batch Weigh, Total No. of Batches, Sub Total, Gross Total, etc.

Preset batch controls the number of batches for Transit Mixer.

Provision to store, edit production details, and mix proportions up to 99 recipes.

Auto and manual control.

CONTROL CABIN:

Cabin is fabricated with M. S. Structured frame and insulated by wood. Strategic location of seat ensures complete view of the plant.
